OBJECTIVE

Junior Developer

RESUME

Qualified and experienced full stack programmer, specialized in development using the latest technologies. Proficient in Typescript and React for frontend development, and with solid skills in the backend, using Python, Django and Docker to create robust and efficient applications.

EDUCATION

IT Technician | PUCPR | 2016
Civil Engineering | UFPR | Currently - Formação 2026

PROFESSIONAL EXPERIENCE

JUNIOR PYTHON DEVELOPER | July 2023 - Currently
DVA Software

- I participated in the development of an innovative system to optimize the operations of a renowned engineering company. I used advanced Python skills and the Django framework to design a robust and efficient solution, providing more agile and precise management of the company's activities.
- We carried out a complete changeover from a platform where all the company's data was stored, to the new system created. For this change we used the Rest API concept to collect the app's data and transfer it to the new system.

INTERN | April 2022 - May 2023
BRF

- Efficient management and analysis of engineering sector databases, with advanced Python proficiency for data processing and analysis. Creation of weekly reports using Excel and automation of processes through Python scripts. Proficient in procedure analysis aimed at creating routines and optimizing processes for the technical sector.

SKILLS
